JOSÉ CHIQUILLO
Frontend Developer

As a Front-End Developer and Graphic Designer, I possess a broad range of skills cultivated from diverse professional experiences, augmented by a solid academic background in graphic design and coding.

I have a proven track record in developing innovative features for financial applications, constructing user-friendly UI libraries, and bringing app prototypes to fruition. Proficient in React, TypeScript, Redux, and Next.js.

Status: Open to remote positions, open to relocating.

PROFESSIONAL EXPERIENCE

Frontend Developer @ **LenioLabs LLC**
11/2021 - now
As a Front-End Developer, I held various roles, contributing significantly to different projects. In one of my engagements, I developed and implemented new features for a financial application using React and TypeScript. My responsibilities ranged from data validation and document processing to submission management, all while maintaining several repositories. I also participated in constructing a Material-UI based Design System Library, fostering consistency and user-friendliness across projects. Additionally, I developed a successful prototype for a mobile application, which was used in focus groups and usability tests and later evolved into a full application.

Frontend Developer @ **Globant**
04/2021 - 11/2021
At Globant, I was part of a dynamic team using Angular 12, tasked with developing new features for an in-house project management tool for a major multinational professional services network. This tool played a pivotal role in managing the taxation processes for large- scale corporate clients, including government entities. Our enhancements revolved around tracking tax declaration status, managing powers of attorney, and handling crucial client documentation and signatures.

Frontend Developer - Contractor
04/2020 - 04/2021
As a freelance developer I have worked in different environments, from small single projects to working remotely for overseas clients and companies using scrum methodology.
Some of my contractor experience includes:

·Front end developer @ **ITESA Innovation Hub - Buenos Aires**
As part of the itesa freelance dev team, I served as a Frontend Developer focusing on React. My work utilized a technology stack including React, Redux, Gatsby, CSS animations, and Firestore Cloud Storage.

·Front end developer @ **TEDEXIS Mobile Solutions - Caracas Venezuela**
With the TEDEXIS team we worked on a client dashboard migration from JAVA to Angular, my role in the migration was of the UI/UX design, and the implementation of features, CRUD and services.

Art Director @ **Dale! Advertising Agency - Buenos Aires**
12/2017 - 02/2019
As a Creative Art Director team member for a year, I collaborated on diverse projects which greatly contributed to our agency's recognition, including winning two WINA awards. My work involved serving various clients and creating comprehensive campaigns that encompassed print media, TV commercials, landing pages, social media, and website design. This role refined my skills in crafting cohesive and effective messages across different platforms.

Freelance Advertising Services
2015 - 2019
For four years, I worked remotely as a freelance graphic designer and art director, in roles that refined my autonomy and time management skills. Engaging with various clients, I honed my ability to understand and fulfill their specific needs, a skill I now utilize in crafting IT solutions. My primary expertise lay in branding and creating campaigns adaptable to diverse media such as print, TV, web, and events. This experience has endowed me with a multifaceted perspective, enriching my current role as a developer.
